

Name: _____

Answer all questions, assuming the following : Answer all questions, assuming the following :

- My system has a 128-byte physical memory space.
- Pages in my system are 16 bytes.
- A process has a 64-byte virtual address space.

- This process has the following page table :

0	3
1	7
2	5
3	2

- I want to read an instruction from virtual address 18 (010010).

1. What is the frame size (in bytes)?
2. How many bits is the VPN (virtual page number)?
3. How many bits is the PFN (physical frame number)?
4. What is the VPN of the instruction I want to read?
5. What is the PFN in which this instruction should be read?
6. What is the physical address at which this instruction should be read?
