

Name: _____

Assume the following :

- The TLB is initially empty
- Each page holds 4 entries from the variable 'array'
- The variable 'array[0]' is the first entry on a page
- The code below is executed

```
int max = array[0];
for (int i = 1; i < 10; i++)
{
    int val = array[i];
    if (val > max)
        max = val;
}
```

-
1. How many TLB misses do you expect?
 2. How many TLB hits do you expect?
 3. What is the TLB hit rate?
 4. Assume my TLB is an 8-way associative cache. How many bits of the VPN are in the TLB index?
