

Name: _____

Assume my computer crashes as I am in the middle of writing data to disk. Answer all questions about file system backup and recovery.

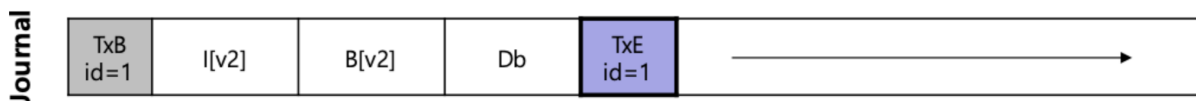

1. When the file system checks for corrupted data, it sees the following journal

(a) Was data on disk overwritten?

(b) How do you recover from this crash?

2. When the file system checks for corrupted data, it now sees the following journal

(a) Was data on disk overwritten?

(b) How do you recover from this crash?
